

Beverly Hills Internal Medicine is proud to provide Concierge Medical Service with a program that is focused on providing superior medical care with unrestricted access to the doctor. This option was designed in consideration of patients who desire longer visits, more direct access to the doctor via technology, for those who travel a long distance to our office and desire Telemedicine services, and for those whose insurance plans have high deductibles, high out of pocket costs, or narrow networks.

The Concierge annual fee will include:

- One yearly complete physical examination by the doctor, including routine in office laboratory tests, ECG, Spirometry, Chest X-ray, Treadmill Stress Test and Pulse oximetry analysis, and Bone Density with Body Fat Analysis, at no additional patient cost.
- Up to 3 follow-up in person or telemedicine visits per year, including basic blood panel if needed at no additional patient cost.
- Direct access to your doctor by cell phone, text, or email with prompt response 24 hours per day/7 days per week/365 days per year (with minor limitations).
- Direct access by cell phone, text, or email to our personal medical assistant between 7 AM to 10 PM, seven days per week. The medical assistant will assist in all administrative matters of your care, including making appointments for other doctors and testing facilities, whether requested by me or others.
- “Extended-time” visits, including 90 minutes for a complete physical exam, 40 minutes for all follow up visits.
- Same day appointments.
- Hospital visits by the doctor personally should you be admitted to Cedars Sinai, UCLA, or Olympia Medical Centers, and via telemedicine otherwise.
- Telemedicine services via Skype, Face-Time, or Text.
- The option of additional customized Concierge services, including visits at Home, Your Office, or Place of Travel, including on weekends, can be arranged in advance for an additional fee.
