

BEVERLY HILLS INTERNAL MEDICINE

Distinctly Superior Medical Care

Beverly Hills Internal Medicine is proud to provide the highest level of personalized attention and private medical care to clients. According to Castle Connolly Top Doctors, The Hollywood Reporter, Los Angeles Magazine, Cedars Sinai Medical Center and Medicare data, our patient outcomes and satisfaction scores continue to be amongst the top 5% in the city. For those who are interested, we also offer Concierge Medical Services. These services are meant to complement the care you currently receive.

Our program is focused on providing personal care and unrestricted access to the doctor, and will be limited to a panel of only 300 patients. This option was designed in consideration of patients who desire longer visits, more direct access via technology, for those who travel and desire Telemedicine services, and for those whose insurance plans have high deductibles, high out of pocket costs, or narrow networks.

The Concierge Medical Service annual fee is \$5,000 per individual, or \$7500 per couple, in addition to any payment from your Insurance Plan or Medicare. The package includes:

- Annual complete 90 minute physical examination by me, including routine in office laboratory tests, ECG, Spirometry, Chest X-ray, Treadmill Stress Test and Pulse oximetry analysis, and Bone Density with Body Fat Analysis, with validated parking.
- At least three 40 minute follow-up in person or telemedicine visits with me annually, including in office blood panel or x-ray, with validated parking.
- Direct access to me by phone, text, or email with prompt response 24 hours per day/7 days per week/365 days per year (with rare exception during air travel).
- Direct access by phone, text, or email to my personal medical assistant between 7 AM to 10 PM, seven days per week. The medical assistant will assist in all administrative matters of your care, including making all of your medical appointments.
- Same day appointments with me during normal business hours.
- Hospital visits by me personally should you be at Cedars Sinai or UCLA, and via telemedicine otherwise.
- Telemedicine services via Zoom, Skype, Face-Time, or Text.
- The option of additional customized Concierge services, including visits at Home, Your Office, or Place of Travel, including on weekends, can be arranged in advance for an additional fee.

There is no greater trust than the one placed in me as your physician and for that I thank you.

Sincerely
